

# Programming Fundamentals - II using Python 🐍

# Lecture

## Problem Solving Practice

- break & continue
- branching
- looping
- coding problems

# Loops

Do something again & again!

**break**

continue

pass

return

# ~~Switch~~ Match Case

in Python 3.10 or higher

```
1  class HelloWorld {
2      public static void main( String args[] ) {
3
4          int weather = 2;
5          //passing variable to the switch
6          switch (weather)
7          {
8              //comparing value of variable against each case
9              case 0:
10                 System.out.println("It is Sunny today!");
11                 break;
12             case 1:
13                 System.out.println("It is Raining today!");
14                 break;
15             case 2:
16                 System.out.println("It is Cloudy today!");
17                 break;
18             //optional
19             default:
20                 System.out.println("Invalid Input!");
21         }
22     }
23 }
```

# No ~~Do~~ While Loop

# Code Demo!

# Number Sum

Find the sum of even numbers from 1 to N using for loop.

**Example**

$N = 4$

**Output**

10

# Triangle Pattern

Print the given Pattern.

Example

$N = 4$

**Output**

\*

\*\*

\*\*\*

\*\*\*\*

# Half Diamond

Print the pattern for given N.

Example

N = 3

**Output**

\*

\*\*\*

\*\*\*\*\*

# Largest Number

Given N numbers, find the largest number.

## Sample Input

N = 7

10, 20, 30, 400, 50, 20, 70

## Sample Output

400

# Print all Primes

Given a and b, print all primes in the range [a,b]

## Input

1 10

## Output

2,3,5,7

# Count Digits

Given a integer, count the digits

**Input**

215

**Output**

3

# Time To Try!

**8 Mins**

# Reverse a Number

Given a integer, reverse the number.

**Input**

215

**Output**

512

# Reverse a Number

Given a integer, reverse the number.

## Input

215

## Output

512
